

Math Rap – Order of Operations

(4 beats per line)

Yo, listen up, gotta keep some order
In ev-ry problem you do
You know to go from left to right...
But there's times you need more rules.

P-M-D-A-S

that's the thing to know
You start with Parentheses then Multiply, Divide,
And finish with Add and Subtract

P-M-D-A-S

that's the thing to know

Say what's the order? What's the order we go?

P-M-D-A-S

You start with Parentheses then Multiply, Divide,
And finish with Add and Subtract

P-M-D-A-S

that's the thing to know

(Adapted from a rap at <http://www.songsforteaching.com/>)

Bullying Rap

“Our class decided to create a rap about bullying to help us remember some of the interesting things we learned. This rap became a classroom theme song and was something we recited everyday. It really helped us to remember our promise, not to bully other people and to try to be nice to everyone.”

<http://www.k12.nf.ca/davis/grassroots/bullying/rap.html>

No Bullying Rap

We don't like bullies
Bullies aren't cool
They can be anyone
At any school.
Bullies like to punch
Bullies like to tease
Bullies make you feel little
And they don't say please.
When you are bullied
There are things you can do
Tell people you trust
And walk away too.
Try to ignore

When a bully calls you names
Don't be the victim
Don't play their games.
We must remember
That bullies have feelings too.
Try be nice to them
And they may be nicer to you.
